FINANCIAL PERFORMANCE REVIEW and VARIANCE ANALYSIS

PT Indofood CBP Sukses Makmur Tbk (ICBP)
Fiscal Year 2023 vs 2024

By David Felix Winata

2025

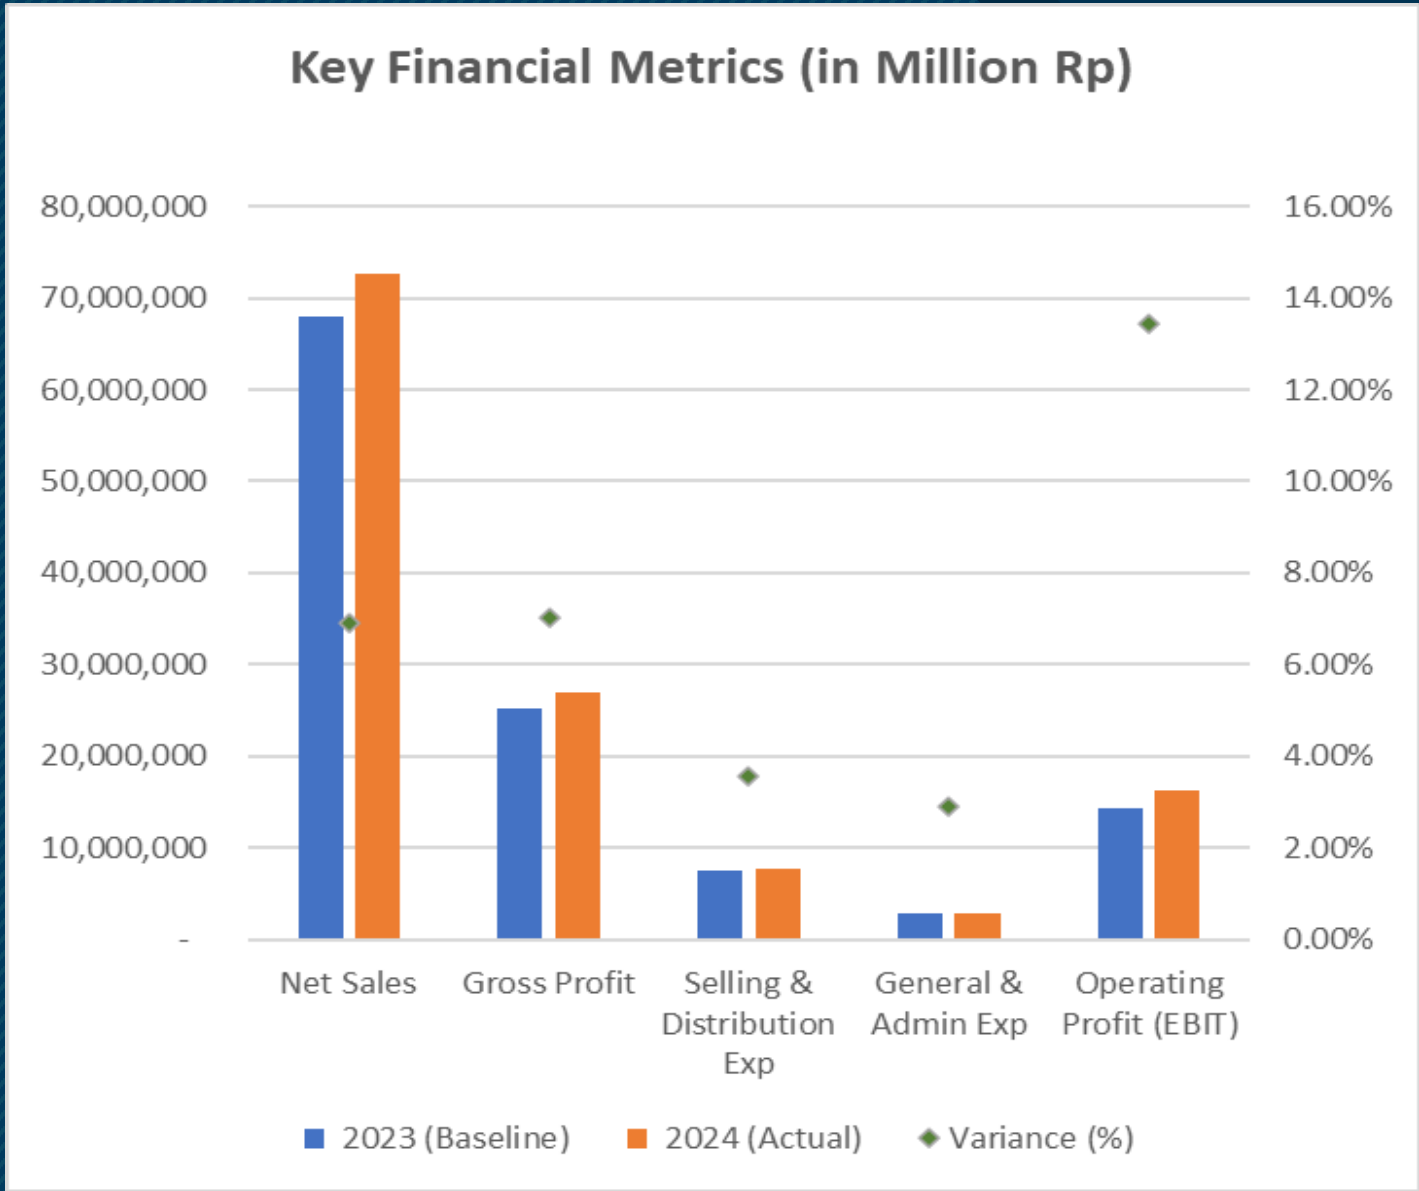

Executive Summary

Strong Top-Line Growth: ICBP recorded a **6.9% YoY** increase in Net Sales to **Rp72.6 trillion**, driven by volume expansion across all business divisions and overseas operations.

Margin Expansion: Despite rising COGS, the company maintained a stable Gross Profit Margin at **37.0%**. Operating Profit (EBIT) grew impressively by **13.44%** to **Rp16.3 trillion**, supported by effective cost management and a **56% reduction** in Other Operating Expenses.

Financial Resilience: Net Income grew by **4.11%** to **Rp8.8 trillion**, successfully absorbing the impact of foreign exchange (FX) losses. ***Key Insight:*** The significant rise in Finance Expenses (110% YoY) highlights a need for stronger FX hedging strategies moving forward.

Income Statement Variance Analysis

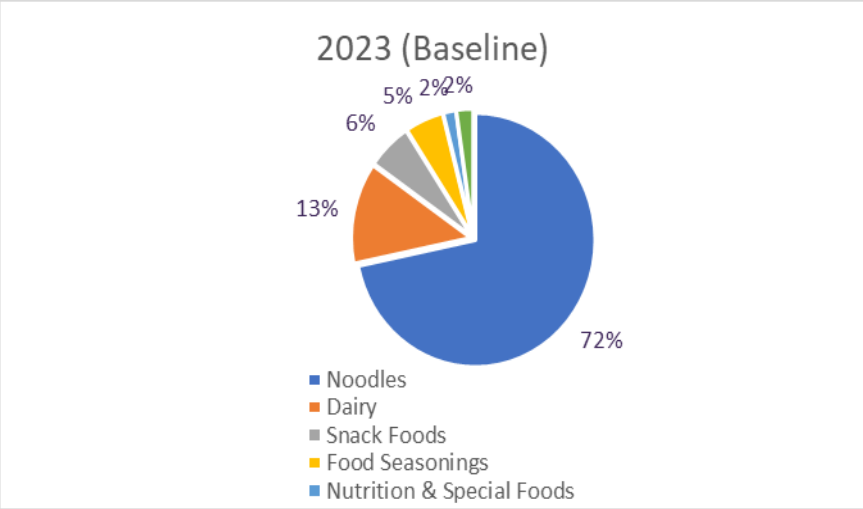

Revenue Growth: Net sales increased by **6.9% YoY** to Rp72.6 Trillion, driven by strong volume across all divisions.

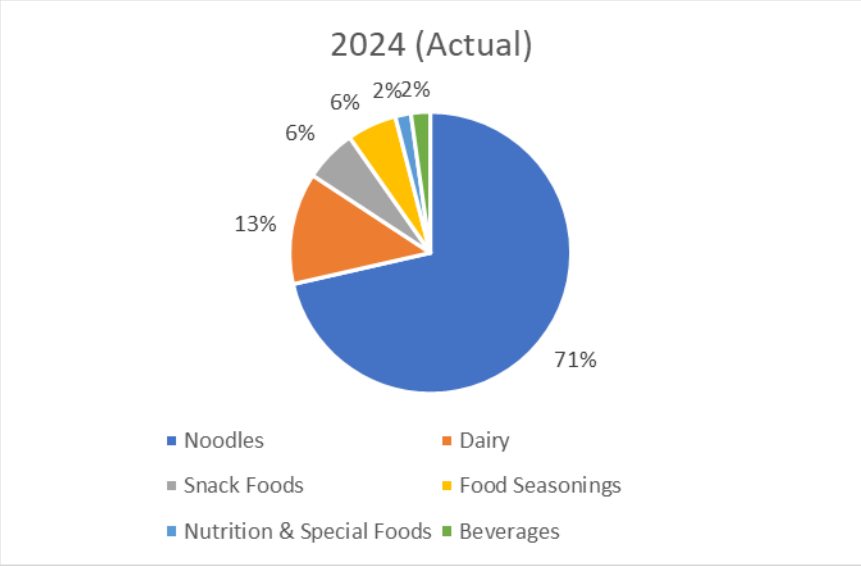

Gross Margin: Successfully maintained at a stable **37.0%** despite rising raw material costs.

Operating Efficiency: EBIT surged by **13.44%** to Rp16.3 Trillion, highlighting effective cost management.

Bottom Line: Net Income grew by **4.11%** to Rp8.8 Trillion.

Revenue Contribution by Segment

Noodles Domination: The Noodles division remains the primary growth engine, contributing approximately **71%** of total consolidated sales in 2024.

Strongest Growth: The Food Seasonings division recorded the highest YoY growth at **+17.1%**, increasing its revenue share from 5% to 6%.

Diversification: Dairy (13%) and Snack Foods (6%) provided a stable revenue cushion, ensuring the business is not overly reliant on a single product line.
